

Customer Journey

Dog Breed Identification Using Transfer Learning

1 Awareness Stage

- User hears about the dog breed identification app through social media or friends.
- Sees ads or demo videos explaining AI-based breed detection.
- Becomes curious about identifying their dog's breed.

2

2 Consideration Stage

- Downloads the app or visits the website.
- Reads about features like high accuracy and fast prediction.
- Checks reviews and ratings.
- Feels interested but concerned about accuracy and privacy.

3 Usage Stage

- Opens the app.
- Uploads or captures a dog image.
- The AI model (using transfer learning) processes the image.
- Receives breed prediction with confidence score.

3 Usage Stage

- Opens the app.
- Uploads or captures a dog image.
- The AI model (using transfer learning) processes the image.
- Receives breed prediction with confidence score.

4 Experience Stage

- Feels happy if prediction is accurate.
- Shares results with friends or on social media.
- Uses the app again for other dogs.

Customer Goal

- Identify dog breed accurately and quickly.
- Get reliable and easy-to-understand results.
